# About the Authors

Jessica Lipnack and Jeffrey Stamps are founders and principals of The Networking Institute, Inc. (TNI), a consulting, research, and professional services company based in West Newton, Massachusetts. Founded in 1982, TNI has a global reputation for its work with corporate, government, nonprofit, and grass-roots networks in the United States, Canada, Europe, Japan, and Australia.

TNI's mission is to help people work together better by understanding, planning, and managing teamnets. We offer consulting services, education, publications, and software to aid the development and operation of teamnets. We speak frequently at public and private events.

TNI is creating a database of people and organizations using teamnet principles. Please send us information about teamnets you know about and your teamnet experiences—the problems you encounter and how you go about solving them—and we'll find a way to connect your example to others.
